I am a Full Stack Web Developer, seeking a role within an organisation that can utilise my unique set of past work experience, to help to shape the future of these industries.

I have been a paraplanner for the last 7 years as well as a financial planner over the last 3 years. I have worked through some of the toughest technical, technological and regulatory change of any industry within Australia. This experience left me feeling like I needed to step out of my role and gather the skills needed to build for a better, and more efficient future in a vital Australian industry.

I consider communication and compassion to be two of my most appreciated traits, I can add value to a range of business units across organisations. I have lead projects and teams throughout my work experience to date and with problem solving at the heart of financial planning, I am well equipped to tackle new problems as they arise - so that client outcomes are met on time.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, jQuery, AJAX, Bootstrap, Halfmoon

Applications: Nil

PROJECTS

Weather Application

<https://github.com/alex-stew> | <https://github.com/alex-stew/weather-app>
